

Teller Pods

Step 1 - Choose Pod Layout/Style: Select from popular designs or customize to fit specific needs (e.g., ADA stations, shelving, privacy panels). All our pod designs support a TCR and UCS. We can also design a custom pod based on your concept or sketch.

Step 2 - Choose Material and Finish: Fenco partners with Wilson Art laminates, Corian solid surfaces and many other leading companies to provide the best color & surface choices to complement your branch's decor.

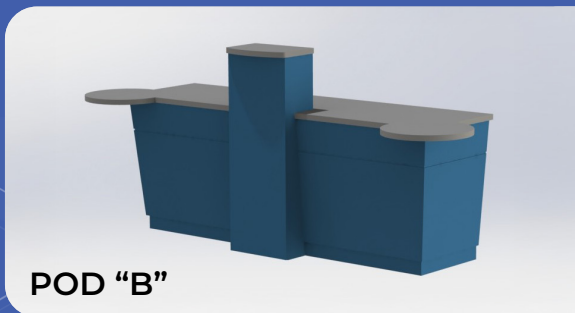

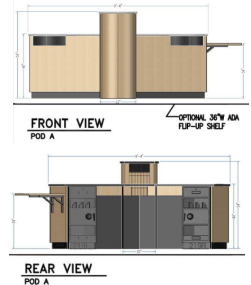

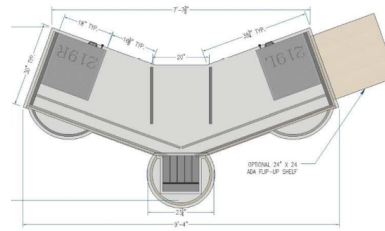

Step 3 - Submit PO & Finalize Design: Fenco provides a quote and drawing based on your selection. Approve the design and submit a PO to place your order, or request revisions.

Step 4 - Delivery & Installation: Typical lead time after signed drawings is 4-6 weeks. Fenco Pods ship fully or partially assembled via common carrier or Fenco's truck from partner mills. For partially assembled pods, budget 2 installers for 2-4 hours per pod (4-8 man hours), depending on complexity.
